Revision Date 10.05.2021

Print Date 11.05.2021

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

Trade name	:	Helix Ultra Professional AF-L 0W-30
Product code	:	001G5577

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture	:	Engine oil.
Uses advised against	:	This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the supplier.

#### 1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: Shell UK Oil Products Limited Shell Centre London SE1 7NA United Kingdom	
Telephone	: (+44) 08007318888	
Telefax	:	
Email Contact for Safety Data Sheet	: If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com	
1.4 Emergency telephone number		

: +44 (0) 151 350 4595 (This telephone number is available 24 hours per day, 7 days per week)

# **SECTION 2: Hazards identification**

# 2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

### 2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)			
Hazard pictograms	:	No Hazard Symbol required	
Signal word	:	No signal word	
Hazard statements	:	PHYSICAL HAZARDS:	

Revision Date	10.05.2021	Print Date 11.05.2021
	Not classified as a phy according to CLP crite HEALTH HAZARDS: Not classified as a hea criteria. ENVIRONMENTAL HA Not classified as enviro according to CLP crite	ria. Alth hazard under CLP AZARDS: onmental hazard
Prevention: Response: Storage: Disposal:	No precautionary phra No precautionary phra No precautionary phra	ses.
	Response: Storage:	No precautionary phra         Response:         No precautionary phra         Storage:         No precautionary phra

Safety data sheet available on request.

# 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used oil may contain harmful impurities.

Not classified as flammable but will burn.

# **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

Chemical nature	<ul> <li>Synthetic base oil and additives. Highly refined mineral oil. The highly refined mineral oil contains &lt;3% (w/w) DMSO- extract, according to IP346. Classification based on DMSO extract content &lt; 3% (Regulation (EC) 1272/2008, Annex VI, Part 3, Note L).</li> </ul>
	<ul> <li>* contains one or more of the following CAS-numbers (REACH registration numbers): 64742-53-6 (01-2119480375- 34), 64742-54-7 (01-2119484627-25), 64742-55-8 (01- 2119487077-29), 64742-56-9 (01-2119480132-48), 64742-65- 0 (01-2119471299-27), 68037-01-4 (01-2119486452-34), 72623-86-0 (01-2119474878-16), 72623-87-1 (01- 2119474889-13), 8042-47-5 (01-2119487078-27), 848301-69- 9 (01-0000020163-82), 68649-12-7 (01-2119527646-33), 151006-60-9 (01-2119523580-47), 163149-28-8 (01- 2119543695-30).</li> </ul>

Revision Date 10.05.2021

Print Date 11.05.2021

#### Hazardous components

Chemical name	CAS-No. EC-No. Registration number	Classification (REGULATION (EC) No 1272/2008)	Concentration (% w/w)
Interchangeable low viscosity base oil (<20,5 cSt @40°C) *	Not Assigned	Asp. Tox.1; H304	0 - 90
Alkaryl amine	36878-20-3 253-249-4 01-2119488911-28	Aquatic Chronic4; H413	1 - 3

For explanation of abbreviations see section 16.

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Protection of first-aiders	: When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.		
If inhaled	: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.		
In case of skin contact	<ul> <li>Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available.</li> <li>If persistent irritation occurs, obtain medical attention.</li> </ul>		
In case of eye contact	<ul> <li>Flush eye with copious quantities of water.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>If persistent irritation occurs, obtain medical attention.</li> </ul>		
If swallowed	: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.		
4.2 Most important symptoms and effects, both acute and delayed			
Symptoms	: Oil acne/folliculitis signs and symptoms may include formation of black pustules and spots on the skin of exposed areas. Ingestion may result in nausea, vomiting and/or diarrhoea.		
4.3 Indication of any immediate medical attention and special treatment needed			
Treatment	: Notes to doctor/physician: Treat symptomatically.		

Revision Date 10.05.2021

# **SECTION 5: Firefighting measures**

# 5.1 Extinguishing media

Suitable extinguishing media Unsuitable extinguishing media	dioxic : Do no	, water spray or fog. Dry chemical powder, carbon le, sand or earth may be used for small fires only. It use water in a jet.
5.2 Special hazards arising from		ance or mixture
Specific hazards during firefighting	mixtu (smol comb	dous combustion products may include: A complex re of airborne solid and liquid particulates and gases (e). Carbon monoxide may be evolved if incomplete ustion occurs. Unidentified organic and inorganic ounds.
5.3 Advice for firefighters		
Special protective equipment for firefighters	glove large Breat a con	er protective equipment including chemical resistant s are to be worn; chemical resistant suit is indicated if contact with spilled product is expected. Self-Contained hing Apparatus must be worn when approaching a fire in fined space. Select fire fighter's clothing approved to ant Standards (e.g. Europe: EN469).
Specific extinguishing methods		xtinguishing measures that are appropriate to local nstances and the surrounding environment.

# **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	: 6.1.1 For non emergency personnel:
	Avoid contact with skin and eyes.
	6.1.2 For emergency responders:
	Avoid contact with skin and eyes.

#### 6.2 Environmental precautions

Local authorities should be advised if significant spillages cannot be contained.

Version 1.2 Revision Date 10.05.2021

Print Date 11.05.2021

#### 6.3 Methods and materials for containment and cleaning up

Methods for cleaning up	<ul> <li>Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth or other containment material.</li> </ul>
	Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.

#### 6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

### **SECTION 7: Handling and storage**

General Precautions	<ul> <li>Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols.</li> <li>Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.</li> </ul>
7.1 Precautions for safe handling	
Advice on safe handling	<ul> <li>Avoid prolonged or repeated contact with skin.</li> <li>Avoid inhaling vapour and/or mists.</li> <li>When handling product in drums, safety footwear should be worn and proper handling equipment should be used.</li> <li>Properly dispose of any contaminated rags or cleaning materials in order to prevent fires.</li> </ul>
Product Transfer	: Proper grounding and bonding procedures should be used during all bulk transfer operations to avoid static accumulation.
7.2 Conditions for safe storage, in	cluding any incompatibilities
Other data	: Keep container tightly closed and in a cool, well-ventilated place. Use properly labeled and closable containers.
	Store at ambient temperature.
	Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.
	The storage of this product may be subject to the Control of Pollution (Oil Storage) (England) Regulations. Further guidance may be obtained from the local environmental agency office.
Packaging material	: Suitable material: For containers or container linings, use mild steel or high density polyethylene. Unsuitable material: PVC.

Version 1.2	Revision Date 10.05.2021	Print Date 11.05.2021
Container Advice	: Polyethylene containers should not to temperatures because of possible rise	
7.3 Specific end use(s)		
Specific use(s)	: Not applicable	

# **SECTION 8: Exposure controls/personal protection**

# 8.1 Control parameters

# **Occupational Exposure Limits**

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral		TWA	5 mg/m3	US. ACGIH Threshold Limit Values

### **Biological occupational exposure limits**

# No biological limit allocated.

# **Monitoring Methods**

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods http://www.cdc.gov/niosh/

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.osha.gov/

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hse.gov.uk/

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany http://www.dguv.de/inhalt/index.jsp

L'Institut National de Recherche et de Securité, (INRS), France http://www.inrs.fr/accueil

# 8.2 Exposure controls

**Engineering measures**The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

Revision Date 10.05.2021

**General Information:** 

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

#### Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Hand protection	s,
<ul> <li>Remarks</li> <li>Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from gloves suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.</li> <li>For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for &gt; 480 minutes where suitable gloves can be identified. Fo short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.</li> </ul>	id Por

# **SECTION 10: Stability and reactivity**

# 10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

### 10.2 Chemical stability

Stable. No hazardous reaction is expected when handled and stored according to provisions

# 10.3 Possibility of hazardous reactions

Hazardous reactions	: Reacts with strong oxidising agents.
10.4 Conditions to avoid	
Conditions to avoid	: Extremes of temperature and direct sunlight.
10.5 Incompatible materials	
Materials to avoid	: Strong oxidising agents.
10.6 Hazardous decomposition p	roducts
Hazardous decomposition products	: No decomposition if stored and applied as directed.

# **SECTION 11: Toxicological information**

# 11.1 Information on toxicological effects

Basis for assessment	:	Information given is based on data on the components and the toxicology of similar products.Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).
Information on likely routes of exposure	•	Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.

# Acute toxicity

Product:

Version 1.2	Revision Date 10.05.2021	Print Date 11.05.2021
Acute oral toxicity	: LD50 rat: > 5,000 mg/kg Remarks: Low toxicity: Based on available data, the classifi	cation criteria are not met.
Acute inhalation toxicity	: Remarks: Based on available data, a are not met.	the classification criteria
Acute dermal toxicity	: LD50 Rabbit: > 5,000 mg/kg Remarks: Low toxicity: Based on available data, the classifi	cation criteria are not met.

#### Skin corrosion/irritation

#### Product:

Remarks: Slightly irritating to skin., Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis., Based on available data, the classification criteria are not met.

#### Serious eye damage/eye irritation

#### Product:

Remarks: Slightly irritating to the eye., Based on available data, the classification criteria are not met.

#### Respiratory or skin sensitisation

#### Product:

Remarks: For respiratory and skin sensitisation:, Not a sensitiser., Based on available data, the classification criteria are not met.

#### Germ cell mutagenicity

#### Product:

: Remarks: Non mutagenic, Based on available data, the classification criteria are not met.

#### Carcinogenicity

#### Product:

Remarks: Not a carcinogen., Based on available data, the classification criteria are not met.

Material	GHS/CLP Carcinogenicity Classification
Highly refined mineral oil	No carcinogenicity classification.

Revision Date 10.05.2021

Print Date 11.05.2021

### **Reproductive toxicity**

#### **Product:**

Remarks: Not a developmental toxicant., Does not impair fertility., Based on available data, the classification criteria are not met.

#### STOT - single exposure

#### Product:

Remarks: Based on available data, the classification criteria are not met.

#### STOT - repeated exposure

#### Product:

Remarks: Based on available data, the classification criteria are not met.

#### Aspiration toxicity

#### Product:

Not an aspiration hazard.

#### **Further information**

#### Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal., ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Continuous contact with used engine oils has caused skin cancer in animal tests.

Remarks: Slightly irritating to respiratory system.

Remarks: Classifications by other authorities under varying regulatory frameworks may exist.

Abbreviations and A	ronyms : The standard abbreviations and acro	onyms used in this	
		document can be looked up in reference literature (e.g.	
	scientific dictionaries) and/or website	es.	
	ACGIH = American Conference of G	Sovernmental Industrial	
	Hygienists		
	ADR = European Agreement concer	rning the International	
	Carriage of Dangerous Goods by Ro		
	AICS = Australian Inventory of Cher		
	ASTM = American Society for Testir	ng and Materials	
	BEL = Biological exposure limits		
	BTEX = Benzene, Toluene, Ethylbe	enzene, Xylenes	
	CAS = Chemical Abstracts Service		
	CEFIC = European Chemical Indust		
	CLP = Classification Packaging and	Labelling	
	COC = Cleveland Open-Cup		
	DIN = Deutsches Institut fur Normur		
	DMEL = Derived Minimal Effect Lev	el	
	DNEL = Derived No Effect Level		
	DSL = Canada Domestic Substance	e List	
	EC = European Commission		
	EC50 = Effective Concentration fifty		
	ECETOC = European Center on Ec	otoxicology and	
	Toxicology Of Chemicals		
	ECHA = European Chemicals Agen		
	EINECS = The European Inventory	of Existing Commercial	
	Chemical Substances		
	EL50 = Effective Loading fifty		
	ENCS = Japanese Existing and Nev	w Chemical Substances	
	Inventory		
	EWC = European Waste Code		
	GHS = Globally Harmonised System	n of Classification and	
	Labelling of Chemicals		
	IARC = International Agency for Res		
	IATA = International Air Transport A	ssociation	
	IC50 = Inhibitory Concentration fifty		
	IL50 = Inhibitory Level fifty IMDG = International Maritime Dang	arous Cooda	
	INV = Chinese Chemicals Inventory		
	IP346 = Institute of Petroleum test		
	determination of polycyclic aromatic		
	KECI = Korea Existing Chemicals In		
	LC50 = Lethal Concentration fifty	iventory	
	LD50 = Lethal Dose fifty per cent. LL/EL/IL = Lethal Loading/Effective	Loading/Inhibitory loading	
	LL50 = Lethal Loading fifty MARPOL = International Conventior	o for the Provention of	
	Pollution From Ships		
	NOEC/NOEL = No Observed Effect	Concentration / No	
	Observed Effect Level		
		- High Production Volume	
	OE_HPV = Occupational Exposure	- migh Froduction volume	

Version 1.2	Revision Date 10.05.2021	Print Date 11.05.2021
PBT = Persistent, Bioaccumulative and PICCS = Philippine Inventory of Chem Substances PNEC = Predicted No Effect Concentra REACH = Registration Evaluation And Chemicals RID = Regulations Relating to Internati Dangerous Goods by Rail SKIN_DES = Skin Designation STEL = Short term exposure limit TRA = Targeted Risk Assessment TSCA = US Toxic Substances Control TWA = Time-Weighted Average vPvB = very Persistent and very Bioac		nicals and Chemical tration d Authorisation Of ational Carriage of ol Act
Further information		
Training advice	:	
	Provide adequate information, instruction operators.	ction and training for
Other information	: No Exposure Scenario annex is attached to this safety data sheet. It is a non-classified mixture containing hazardous substances as detailed in Section 3; relevant information from Exposure Scenarios for the hazardous substances contained have been integrated into the core sections 1-16 of this SDS.	
	A vertical bar ( ) in the left margin ind from the previous version.	icates an amendment
Sources of key data used to compile the Safety Data Sheet	:	ited to one or more
	The quoted data are from, but not lim sources of information (e.g. toxicolog Health Services, material suppliers' d IUCLID date base, EC 1272 regulation	ical data from Shell lata, CONCAWE, EU
