#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1 Product identifier

| Trade name   | : Shell Spirax S4 TXM |
|--------------|-----------------------|
| Product code | : 001D8246            |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Use of the Sub-<br>stance/Mixture | : Transmission oil.   |
|-----------------------------------|---|
| Uses advised against              | :<br>This product must not be used in applications other than those<br>listed in Section 1 without first seeking the advice of the sup-<br>plier. |

#### 1.3 Details of the supplier of the safety data sheet

| Manufacturer/Supplier            | <ul> <li>Shell UK Oil Products Limited</li> <li>Shell Centre</li> <li>London</li> <li>SE1 7NA</li> <li>United Kingdom</li> </ul> |
|----------------------------------|--|
| Telephone                        | : (+44) 08007318888  |
| Telefax                          |  |
| Contact for Safety Data<br>Sheet | : If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com                                    |

1.4 Emergency telephone number

: +44 (0) 1235 239 670 (This telephone number is available 24 hours per day, 7 days per week)

#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

#### Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

#### 2.2 Label elements

#### Labelling (REGULATION (EC) No 1272/2008)

| Hazard pictograms<br>Signal word | : | No Hazard Symbol required<br>No signal word                               |  |

#### 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Ecological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Toxicological information: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities. Not classified as flammable but will burn.

#### **SECTION 3: Composition/information on ingredients**

#### 3.2 Mixtures

| Chemical nature | : Highly refined mineral oils and additives.               |
|-----------------|--|
|                 | The highly refined mineral oil contains <3% (w/w) DMSO-    |
|                 | extract, according to IP346.                               |
|                 | Classification based on DMSO extract content < 3% (Regula- |
|                 | tion (EC) 1272/2008, Annex VI, Part 3, Note L).            |

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Protection of first-aiders      | :    | When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.                               |  |  |
|---------------------------------|------|---|--|--|
| If inhaled                      | :    | No treatment necessary under normal conditions of use.<br>If symptoms persist, obtain medical advice.   |  |  |
| In case of skin contact         | :    | Remove contaminated clothing. Flush exposed area with wa-<br>ter and follow by washing with soap if available.<br>If persistent irritation occurs, obtain medical attention.              |  |  |
| In case of eye contact          | :    | Flush eye with copious quantities of water.<br>Remove contact lenses, if present and easy to do. Continue<br>rinsing.<br>If persistent irritation occurs, obtain medical attention.       |  |  |
| If swallowed                    | :    | In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.  |  |  |
| 4.2 Most important symptoms ar  | nd e | effects, both acute and delayed   |  |  |
| Symptoms                        | :    | Oil acne/folliculitis signs and symptoms may include formation<br>of black pustules and spots on the skin of exposed areas.<br>Ingestion may result in nausea, vomiting and/or diarrhoea. |  |  |
| 4.3 Indication of any immediate | me   | dical attention and special treatment needed  |  |  |
| Treatment                       | :    | Notes to doctor/physician:<br>Treat symptomatically.  |  |  |
| SECTION 5: Firefighting meas    | sur  | es  |  |  |
| 5.1 Extinguishing media         |      |   |  |  |
| Suitable extinguishing media    | :    | Foam, water spray or fog. Dry chemical powder, carbon diox-<br>ide, sand or earth may be used for small fires only.   |  |  |

According to EC No 1907/2006 as amended as at the date of this SDS

#### **Biological occupational exposure limits**

#### 8.2 Exposure controls

#### Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

#### Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

| Eye protection | : | If material is handled such that it could be splashed into eyes, |
|----------------|---|--|
|                |   | protective eyewear is recommended.                               |
|                |   | Approved to EU Standard EN166.                                   |

#### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

#### 10.2 Chemical stability

Stable.

No hazardous reaction is expected when handled and stored according to provisions

# 10.3 Possibility of hazardous reactions Hazardous reactions Reacts with strong oxidising agents. 10.4 Conditions to avoid Conditions to avoid Extremes of temperature and direct sunlight

| Conditions to avoid | : | Extremes of temperature and direct sunlight. |
|---------------------|---|--|
|                     |   |  |

## 10.5 Incompatible materials

| Materials to avoid | : | Strong oxidising agents. |
|--------------------|---|--------------------------|
|--------------------|---|--------------------------|
